PRESS RELEASE

Electrical Engineer Achieves Registered Communications Distribution Designer designation

Anchorage, AK — AMC Engineers announces John Hood, EIT, RCDD has been recognized as a Registered Communications Distribution Designer (RCDD) by the Building Industry Consulting Service International.

Those awarded the RCDD credential have demonstrated expertise in the design, implementation, and integration of telecommunications, security, audio/visual and other related low voltage and IT infrastructure.

Since joining AMC Engineers, Hood has actively participated in several energy upgrades and remodels for multiple ASD schools, the Ted Stevens Anchorage International Airport (ANC), and government agencies. Hood has considerable experience designing low voltage systems for several public works projects including the new Alaska Scientific Crime Detection Laboratory on behalf of the Department of Public Safety, the ANC Airline Relocation and Airline Ticket Office Buildout project managed by Department of Transportation.

AMC Engineers is an employee-owned, award-winning Alaskan design engineering firm specializing in mechanical, electrical, security, control and telecommunications engineering. AMC has over 29 years experience designing schools and universities, hospitals, airports, recreational and other facilities.
