PRESS RELEASE

AMC's Electrical Engineer Passes PE Exam

Anchorage, AK—AMC Engineers is pleased to announce Aaron Jordan has passed his Professional Engineering exam.

Jordan has a Bachelor's in Electrical Engineering from the University of Alaska Fairbanks. He is currently working on the Palmer State Office Building Remodel; the design of shop equipment shutdown for 19 schools in the Anchorage School District; and the Ted Stevens Anchorage International Airport Badging and Communications Center. Aaron was a contributing engineer on the Clark Middle School Renewal and the Ted Stevens Anchorage International Airport Terminal Connector; both projects received an Illumination award, from the Illuminating Engineering Society, for excellence in lighting design.

AMC Engineers is a full service, award-winning Alaskan engineering firm specializing in mechanical, electrical, control and telecommunications systems design and construction.
