# PRESS RELEASE

## AMC Engineer Jessica Malecha Certified LEED AP BD+C

**Anchorage, AK** — AMC Engineers announces Jessica Malecha, EIT, has attained the specialty designation of LEED AP with Building Design and Construction (BD+C).

The LEED (Leadership in Energy and Environmental Design) Green Building Rating System™ is a nationally accepted benchmark for the design, construction and operation of high-performance green buildings. BD+C-accredited professionals have demonstrated a thorough understanding of green building practices, principles and familiarity with LEED requirements, resources and processes.

Jessica coordinated the LEED process for the mechanical and electrical design team on Fred and Sara Machetanz Elementary School and Susitna Valley Jr./Sr. High School. The design team integrated sustainable design practices and energy cost savings which ultimately allowed the projects to receive LEED Silver certification, making Machetanz Elementary the first LEED school in Alaska and Susitna Valley High School the northernmost LEED school to date. Jessica is currently involved in the LEED coordination for Bethel Aquatic Training and Health Center. Jessica is also a member of the USGBC Cascadia Chapter.

AMC Engineers is an employee-owned, award-winning Alaskan design engineering firm specializing in mechanical, electrical, security, control and telecommunications engineering. AMC has over 29 years experience designing schools, universities, hospitals, airports, recreational and other facilities.
