# PRESS RELEASE

## AMC's Electrical Engineer Passes PE Exam

**Anchorage, AK**—AMC Engineers is pleased to announce Brian Hayden has passed his professional engineering exam.

Brian Hayden, PE, has a Bachelor's in Electrical Engineering from Colorado School of Mines. An AMC employee since August 2001, he has designed lighting, power, and special systems for schools, hospitals, offices, warehouses in Southcentral Alaska. He is currently working on the Alaska Railroad Historic Train Depot Rehabilitation project, providing the power design, and the Kenai Community Library, providing the lighting and special system design. Brian designed the fire alarm, security, intercom, and telecommunications systems for the Fred and Sara Machetanz Elementary School, the first LEED-certified school in Alaska. He also designed the power and telecom systems for Susitna Valley Replacement High School.

AMC Engineers is a full service, award-winning Alaskan engineering firm specializing in mechanical, electrical, control and telecommunications systems design and construction.
