PRESS RELEASE

AMC Employees Earn CDT Certification

Anchorage, AK—AMC Engineers is pleased to announce Ed Kamienski, PE, and John Lackey, EIT, have passed the Construction Specifications Institute's Certified Document Technologist (CDT) examination.

CDT Certification is awarded to individuals who have demonstrated experience, advanced knowledge and professional expertise in the preparation and evaluation of construction contracts and the administration of construction projects as prescribed by CSI. AMC's staff now includes 25 engineers, designers and support staff who are CSI-certified.

Kamienski is working on the new swimming pool for Kodiak Island Borough, UAA's renovation of its Aircraft Hangar and Science Building, and energy conservation lighting upgrades for several ASD schools. Lackey is currently working on the new Department of Public Safety Statewide Services Crime Laboratory, Ted Stevens Anchorage International Airport Operations Center and Terminal Connector, and the Palmer State Office Building Renovation.

AMC Engineers is a full service, award-winning Alaskan engineering firm specializing in mechanical, electrical, control and telecommunications systems design and construction.
