

Electrical Engineer

AMC Engineers is actively searching for an entry level electrical engineer or licensed professional electrical engineer to join our Anchorage office. Applicant will work as a member of our design team on commercial and institutional design projects. Advancement opportunities are unlimited!

At AMC Engineers, people are our ultimate focus. We strive to design safe, comfortable, and maintainable high-performance building systems for a wide range of facilities, each with specific (and often unique) design challenges. Founded in 1981, AMC Engineers is an employee-owned company staffed by 29 professionals including 13 licensed mechanical and electrical engineers.

Position Requirements for Entry Level Electrical Engineer

- Bachelor's Degree in Electrical Engineering from an ABET accredited curriculum, or equivalent, with a minimum of 3.0 cumulative GPA
- Passed the Fundamentals of Engineering (FE) exam or ability to pass within six months of hire date
- Valid Driver License and acceptable driving record
- Ability to successfully pass a background check

Position Requirements for Licensed Professional Electrical Engineer

- Bachelor's Degree in Electrical Engineering from an ABET accredited curriculum, or equivalent, with a minimum of 3.0 cumulative GPA, plus appropriate continuing education
- Alaska State Professional Electrical Engineer License or the ability to obtain it by comity
- Minimum 4-years' experience as an Electrical Design Engineer
- Valid Driver License and acceptable driving record
- Ability to successfully pass a background check

Knowledge, Skills, and Abilities

- Professional, personable, outgoing, technically competent, and highly self-motivated
- Goal oriented for work within a team building environment
- Excellent verbal and written communication skills

Please submit your resume and cover letter to info@amc-engineers.com
