Electrical Engineer in Training

Summary: AMC Engineers is actively searching for an electrical engineer in training to join our Anchorage office. Applicant must be professional, technically competent, personable, outgoing and self-motivated. Applicant will work as a member of our design team on commercial and institutional design projects. Advancement opportunities are unlimited based on applicant's performance.

Position Requirements:

- Bachelor's Degree in Electrical Engineering from an ABET accredited curriculum with a minimum of 3.0 cumulative GPA.
- Passed the Fundamentals of Engineering (FE) exam or ability to pass within six months of hire date.
- Valid Driver License and acceptable driving record.
- Ability to successfully pass background check.

Knowledge, Skills and Abilities:

- Self-motivated and goal driven for work within a team environment.
- Strong verbal and written communication skills.
- Ability to work independently.
- Ability to work on multiple projects simultaneously.
- Ability to manage deadlines.
- Detail oriented.
- Experience with AutoCAD/Revit CAD Software.
- Hands on experience is a plus.

Please submit your resume and cover letter to info@amc-engineers.com or upload to <http://amc-engineers.com/careers/>
