AMC ENGINEERS

AMC Engineers (AMC) is committed to the design of well-engineered, energy efficient and sustainable mechanical, electrical and plumbing (MEP) systems tailored for new, remodel, or expansion education facilities.

We aim to meet our client's design goals while minimizing environmental impact throughout the life of the facility. AMC has a solid team of highly trained professional engineers and designers to help select the most appropriate MEP systems which are sustainable, energy efficient, and applicable for local operations and maintenance.

AMC offers comprehensive project support services including:

- Mechanical, Electrical and Plumbing (MEP) systems evaluation and design
- Energy modeling (operational cost analysis)
- Life cycle cost analysis
- Life safety code compliance
- Master/phased renovation plans
- Bidding/permitting support
- Construction administration services
- Building systems commissioning
- Warranty support services
- Lifetime building engineering support
